Predicate Nominative Answer Key

Understanding the concept of predicate nominatives is essential for mastering English grammar, especially when analyzing sentence structures and improving writing clarity. Whether you're a student preparing for exams, a language teacher designing lesson plans, or a grammar enthusiast seeking to refine your skills, knowing how to identify and explain predicate nominatives is crucial. This article provides a comprehensive guide to the predicate nominative answer key, offering detailed explanations, examples, and tips to enhance your grasp of this vital grammatical element.

What Is a Predicate Nominative?

A predicate nominative is a noun or pronoun that follows a linking verb and renames, identifies, or provides additional information about the subject of the sentence. It completes the meaning of the subject by equating it to another noun or pronoun.

Key points about predicate nominatives:

- They always follow a linking verb, such as be, become, seem, appear, remain, turn, go, and others.
- They are nouns or pronouns.
- They rename or define the subject of the sentence.
- They are part of the predicate, specifically the predicate nominative.

Example sentences:

- The winner is Sarah.

(Sarah is a predicate nominative renaming the subject The winner.)

- My favorite hobby is reading.

(Reading is a predicate nominative identifying the subject hobby.)

- The sky became dark.

(Dark is an adjective acting as a predicate complement, but in sentences like "The sky became a shade of blue," the phrase "a shade of blue" would be a predicate nominative if it renames sky.)

Difference Between Predicate Nominative and Predicate Adjective

While both predicate nominatives and predicate adjectives follow linking verbs and are part of the predicate, they serve different functions:

- Predicate Nominative: Renames or identifies the subject. It is a noun or pronoun.
- Predicate Adjective: Describes or modifies the subject. It is an adjective.

Examples:

- Predicate Nominative:

My brother is a doctor. (Here, a doctor renames my brother)

- Predicate Adjective:

My brother is healthy. (Here, healthy describes my brother)

How to Identify a Predicate Nominative

Identifying the predicate nominative involves several steps:

- Locate the linking verb:

These verbs connect the subject to additional information. Common linking verbs include is, was, were, am, be, being, been, becomes, seems, etc.

- Find the noun or pronoun that follows the linking verb:

This is often the candidate for the predicate nominative.

- Determine if the noun or pronoun renames or identifies the subject:

If it does, it's a predicate nominative.

- Test by replacing the noun with the subject:

For example, in "The winner is Sarah," replace Sarah with she to see if the sentence still makes sense: "The winner is she." Since it does, Sarah is a predicate nominative.

An answer key for predicate nominatives typically involves matching sentences with their correct predicate nominatives or identifying the predicate nominative in a sentence.

Common question types include:

- Multiple-choice questions asking which word is the predicate nominative.

What Is a Predicate Nominative?

Before exploring the answer key, it's essential to understand what a predicate nominative (also known as a subject complement) is.

Definition

A predicate nominative is a noun or pronoun that follows a linking verb and renames or identifies the subject of the sentence. It provides additional information about the subject, effectively completing the idea initiated by the subject and the linking verb.

Characteristics

- It always follows a linking verb (such as is, was, were, be, become, seems, etc.).

Sentence Components

A basic sentence with a predicate nominative typically has the following structure:
