What Is Ortho Bionomy?

Ortho Bionomy is a holistic healing method developed in the 1970s by British osteopath Dr. Arthur Pauls. The name derives from Greek and Latin roots: "ortho" meaning correct or straight, "bionomy" meaning the law of life. Essentially, it translates to "the law of correct movement," emphasizing natural, pain-free motion and body awareness.

This modality focuses on gently encouraging the body's innate self-correcting abilities. Unlike invasive therapies, Ortho Bionomy employs gentle positioning, movement, and proprioceptive cues to facilitate relaxation and alignment. It is based on the understanding that the body, when given the right conditions, can heal itself.
